# We pioneer motion

Con nuestros productos y soluciones innovadoras, estamos preparando el camino para la movilidad del futuro que será guiada por la movilidad eléctrica, optimizando los motores de combustión interna que actualmente se utilizan. Aunque actualmente seguimos participando activamente en ambos campos, estamos creando una base firme para la movilidad eléctrica a través de nuestra división de sistemas de e-Mobility. Y en el caso de los motores de combustión interna, trabajamos para convertir el potencial de optimización hasta un 30% más eficaz.

Actualmente, Schaeffler es un proveedor para casi todos los fabricantes de vehículos automotores. Sin embargo, en cuanto a movilidad, no nos limitamos a la división automotriz. Schaeffler tiene una gran participación en el desarrollo y fabricación de rodamientos y componentes de precisión para maquinaria de otras industrias. Ha suministrado una amplia gama de productos tanto al mercado de los vehículos impulsados por pedales convencionales, como para bicicletas eléctricas (e-bikes). Además, tenemos más de 100 años desarrollando soluciones innovadoras para aplicaciones en vehículos ferroviarios, tales como rodamientos de rueda, componentes para motores de tracción y de transmisión; rodamientos para vagones de tren y sistemas de inclinación, así como puertas y otras numerosas aplicaciones. En el sector aeroespacial, hemos fabricado rodamientos de alta precisión para motores de aviones, helicópteros, así como para el Transbordador Espacial de Estados Unidos, y el vehículo de lanzamiento "Ariane" en Europa.

Respecto a la movilidad del futuro, continuamos avanzando a lo largo del camino para que nuestra compañía siga siendo considerada como una empresa líder en innovación, brindando respuestas inteligentes a los grandes retos que nos presentan los avances tecnológicos.

# 70 años de experiencia y calidad de Equipo Original INA

En 1946 los hermanos Wilhelm y Georg Schaeffler crearon INA al descubrir la necesidad que los mecánicos tenían sobre las refacciones para el Sistema de Distribución y Accesorios. Pero no es hasta 1954 cuando INA lanza su más grande descubrimiento: los Rodamientos de agujas, lanzando al mismo tiempo su primer catálogo y generando un gran avance para la industria automotriz.

La producción de este producto estrella comienza en 1957 en Llanelli, la primera planta extranjera en Gran Bretaña con únicamente 6 empleados.

Con el paso del tiempo, INA se ha visto rodeado de grandes avances que le permiten darse a conocer como una marca de calidad y tecnología de punta, por ejemplo aplicando tecnología de corte fino de alta precisión en los productos.

Es así como INA ha construido una larga y exitosa trayectoria siempre buscando satisfacer las necesidades básicas de sus clientes y apostar por el desarrollo de la industria automotriz.

La competitividad en el mercado no ha impedido la evolución de INA. Calidad y Tecnología son nuestros pilares de diferenciación entre los demás, convirtiéndonos en especialistas del Aftermarket alrededor del mundo.

## La combinación perfecta...

### Perfección: Componente básico de INA

INA como miembro del grupo Schaeffler desarrolla, fabrica y suministra poleas, tensores y rodamientos para el motor y la transmisión.

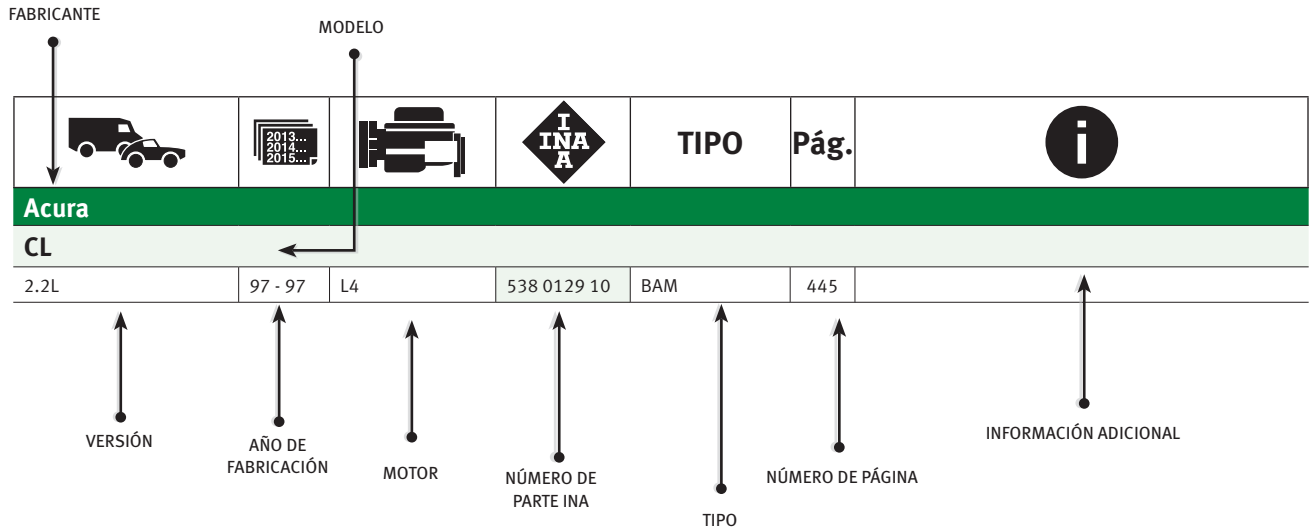

Todos sus productos son trabajados con un objetivo de “cero defectos” aplicando medidas en todos los departamentos para garantizar la prevención de defectos, y no simplemente desertar en cuanto son detectados.

La calidad es una característica que INA tiene prohibido quebrantar.

Las relaciones que INA tiene con sus clientes son importantes, ya que el desarrollo e innovación de nuevos productos se formula con base en las necesidades y exigencias del mercado.

Es por esto que la comunicación es parte fundamental para desarrollar con creatividad nuevas soluciones a los problemas que van surgiendo gracias al avance de la tecnología.

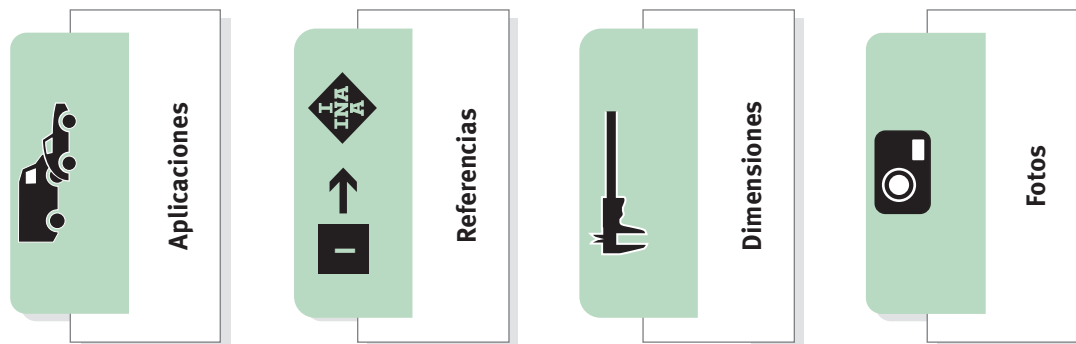

BAC	Bomba de Agua Conmutable	PBAM	Polea bomba de agua mecánica
BAE	Bomba de agua eléctrica	PCA	Polea de cigüeñal del sistema de accesorios
BAM	Bomba de agua mecánica	PGA	Polea guía de accesorios
FEAD BELT	Banda de accesorios (Poli-V)	PGD	Polea guía de distribución
FEAD KIT	Kit de accesorios	PTA	Polea tensora de accesorios
GTC	Guía tensora de cadena de distribución	PTD	Polea tensora de distribución
KCBA	Kit de cadena de bomba de aceite	PTM	Polea tensora de motor
KCD	Kit de cadena de distribución	THA	Tensor hidráulico de accesorios
KIT	Kit de banda de distribución	THC	Tensor hidráulico de cadena de distribución
Kit + BAM	Kit de banda de distribución con bomba de agua	THD	Tensor hidráulico de banda distribución
OAD	Polea decopladora de alternador	TMM	Módulo de gestión térmica
OAP	Polea de giro libre		

Engranajes de ajuste variable de arboles de leva	
Válvula selenoide	
Kit de blancín y pivote hidráulico	
Balancín	
Buzos mecánicos/ Hidráulicos	
Buzo hidráulico con apoyo giratorio	
Soporte de balancines	

**Pestañas por Sección**

El presente catálogo ha sido elaborado con gran cuidado habiéndose verificado la exactitud de los datos contenidos en él, sin embargo, no nos hacemos responsables por posibles datos erróneos o incompletos.

Debido al continuo desarrollo de nuestros productos, nos reservamos el derecho de introducir modificaciones.

Schaeffler Automotive Aftermarket Mexico S. de R. L. de C.V.

## Funcionamiento del tren valvular:

Un motor de combustión interna debe suministrar de manera cíclica aire fresco y de igual forma remover los gases de combustión. La función del tren valvular es abrir y cerrar las válvulas de admisión y escape para llevar a cabo este proceso de la manera más eficiente posible.

Dependiendo del diseño del motor, la posición de los árboles de levas así como el número de válvulas impulsadas varían.

Debido a esta función, el tren valvular está expuesto a altas aceleraciones y desaceleraciones, adicionalmente que las válvulas de escape tienen que soportar temperaturas extremas derivadas de los gases de combustión.

Para permitir el funcionamiento correcto, el tren valvular debe:

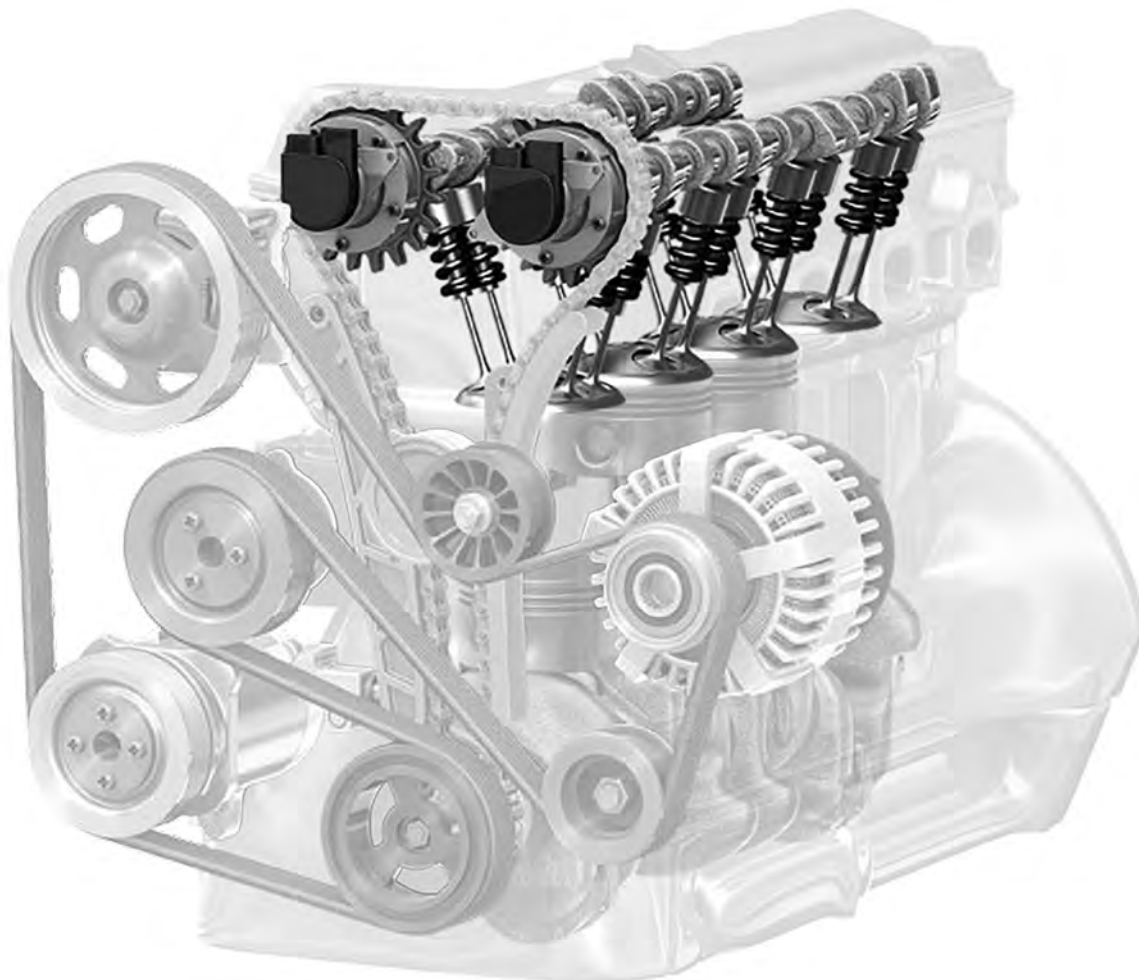

- Ser muy resistente
- Producir bajos niveles de fricción
- Asegurar la suficiente disipación de calor de las válvulas.

Para asegurar el funcionamiento correcto, también es crucial evitar el juego valvular y mantener las características de rendimiento del motor a lo largo de su vida útil.

## ¿Qué puedes esperar de INA?

**INA** es el principal productor de todo tipo de componentes del tren valvular. Como líder tecnológico, nuestro enfoque está en la más alta precisión en producción y ensamble de todos los productos de nuestro catálogo, dentro de los cuales se encuentran productos conmutables.

Nuestros componentes de primer nivel en el tren valvular, soportan crecientes temperaturas y altas presiones en cualquier tamaño de motor. Con nuestro rango de productos y soluciones de reparación, **INA** está idóneamente posicionada en el mercado del repuesto, permitiendo reparaciones profesionales y eficientes del tren valvular.

## **INA como líder tecnológico - una historia de éxito**

La calidad confiable de los productos **INA de Schaeffler**, es altamente reconocida tanto en Europa como en el resto del mundo, de lo cual estamos muy orgullosos y eso hace que nuestro compromiso al futuro sea más grande.

## Cobertura de componentes del tren valvular.

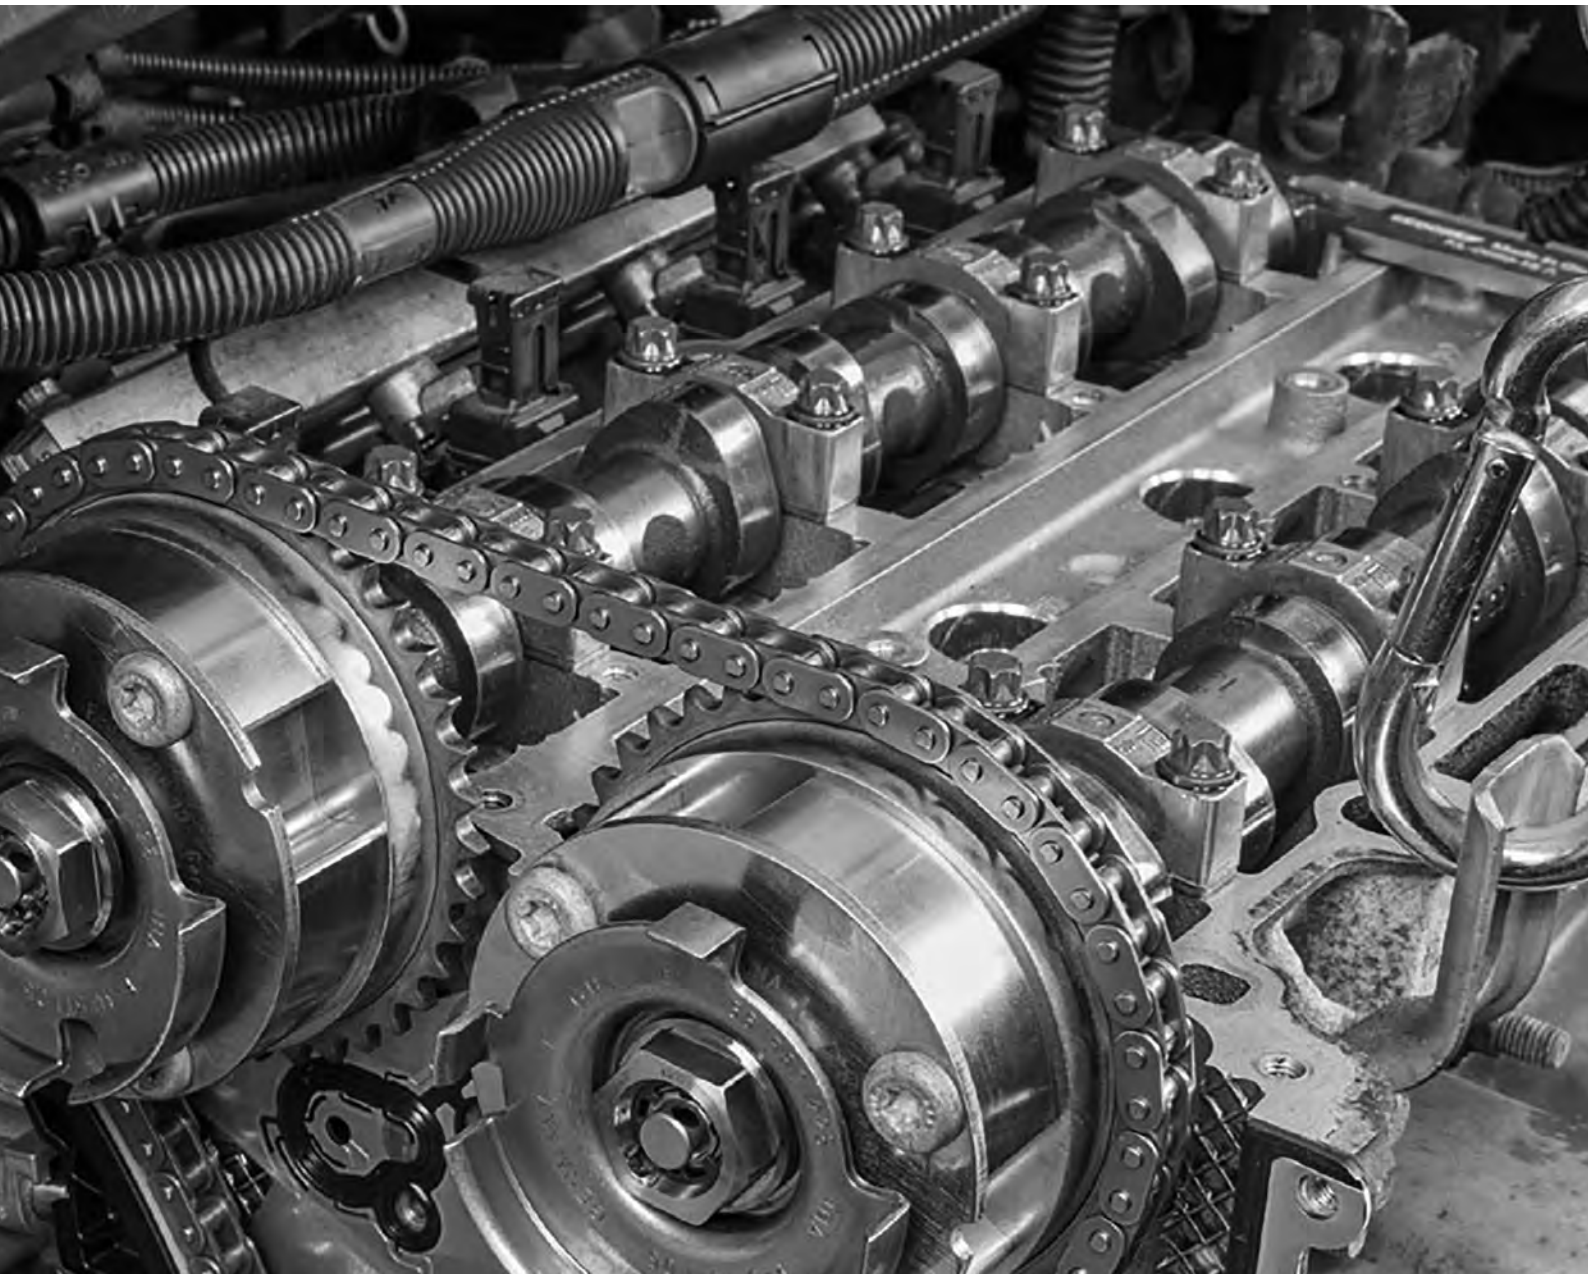

Como líder productor en componentes del tren valvular INA ofrece un rango de producto que no deja nada que desear.

Pero la diversidad de producto es sólo uno de los aspectos que ofrece el rango de productos de INA.

Nuestros componentes del tren valvular están equipados con todos los componentes necesarios para realizar la instalación correcta del producto.

El rango de producto que INA ofrece incluye variadores de árboles de levas tanto hidráulicos como eléctricos, con la ayuda de estos productos, los tiempos de apertura/ cierre pueden ser ajustados de manera variable, lo cual afecta de manera positiva la eficiencia del motor.

Buzos, Balancines, pivotes hidráulicos también están incluidos en la gama de productos de INA.

1.

2.

3.

4.

5.

6.

7.

8.

### La gama de INA:

1. Variadores de árboles de leva para cadena de distribución (Hidráulicos y eléctricos)
2. Engranajes variadores de árboles de leva para banda de distribución
3. Válvulas centrales
4. Válvulas de control
5. Balancín Flotante
6. Balancín Mecánico
7. Pivote hidráulico
8. Buzos (mecánicos e hidráulicos)

## Nuestro enfoque en las diferentes etapas de desarrollo

INA liderea los desarrollos tecnológicos y seguirá influenciando significativamente en el futuro.

Los objetivos del desarrollo de los motores están enfocados principalmente en los siguientes aspectos:

- Reducción de contaminantes CO2
- Reducción de pérdidas por fricción
- Incrementar la eficiencia de los motores.

Algunos de los desarrollos de INA que permiten lograr los objetivos anteriormente mencionados son:

### **UNIAIR**

Usa el primer sistema Electrohidráulico en el mundo que permite totalmente el control variable de las válvulas de admisión en motores de gasolina y diésel, lo cual, hace que el motor funcione de la manera más eficiente posible.

Este sistema logra que el consumo de combustible se reduzca hasta un 10%, y que el torque de la unidad se incremente hasta un 15%.

### **Balancines conmutables**

En conjunto con los elementos compensadores hidráulicos de ajuste de válvulas, estos proveen un ajuste constante y permanente de las válvulas. El contacto con la leva es a través de un elemento rodante.

Con el uso de estos elementos rodantes, el bajo desgaste y el libre mantenimiento causa mucha menos pérdida por fricción en comparación con los buzos tradicionales.

### **Unidad electromecánica de fases del árbol de levas (Electromechanical Camshaft Phasing unit-ECP)**

La unidad ECP (por sus siglas en inglés) desarrollada y producida por Schaeffler permite al árbol de levas el ajuste más rápido y efectivo a las condiciones prevalecientes del motor.

Esto hace que el consumo de combustible y emisiones CO2 se reduzcan de manera considerable y de igual manera, que la dinámica de conducción se mejore particularmente a baja velocidad. De interés: a diferencia de un temporizador hidráulico, con el ECP es posible girar el árbol de levas mientras el motor está detenido.

# SIMPLEMENTE EL MEJOR

## Con la OAP, puedes confiar en nuestra experiencia

La OAP fue inventada por ingenieros de Schaeffler en 1995. Desde entonces, en INA hemos producido más de 250 millones de unidades manteniendo un desarrollo continuo de la OAP.

## **Embragues de Tractor LuK: ¡El número uno en el campo!**

Los embragues LuK hacen más que garantizar la operabilidad del tractor. Muchas veces, también tienen que hacer funcionar máquinas secundarias a través de la toma de fuerza.

Todos los fabricantes líderes de tractores confían en la durabilidad, rentabilidad y las excelentes cualidades de amortiguación de los sistemas de embrague de tractor LuK. Nuestra amplia gama de productos proporciona el embrague adecuado para cada propósito.

No es casualidad que LuK sea el líder mundial en embragues agrícolas.

# BRILLANTE

## Kits de banda de distribución de INA

Nuestros Kits de banda de distribución son la primera opción para el mantenimiento regular en sistema de distribución, debido que contienen todos los componentes necesarios para realizar la reparación.

INA ofrece soluciones especialmente desarrolladas para cada vehículo con la opción de tener incluida la bomba de agua.

# REALMENTE TODO.

**FAG**

## Todo lo que necesitas, ensamblado con la mayor precisión.

Cuando desarrollamos soluciones de reparación de rodamientos, lo hacemos al 100%. Esta premisa no solo aplica a la calidad y confiabilidad de nuestros productos, sino también al amplio rango de aplicaciones que ofrecemos. Diseñadas con la mayor precisión y con todos los componentes requeridos. Soluciones simples incluso para aplicaciones complejas — eso es la calidad Schaeffler.
